4 of 4 review helpful A gem By NC This is in my opinion a classic It develops basically a compatibilist account which takes moral responsibility and the freedom necessary for it as compatible with the truth of determinism It takes off on a strawsonian theme that views our moral reactive emotions such as resentment and indignation as justified on the particular quality of will of those whose actions are under moral control Perhaps everything we think feel and do is determined and humans like stones or clouds are slaves to the laws of nature Would that be a terrible state Philosophers who take the incompatibilist position think so arguing that a deterministic world would be one without moral responsibility and perhaps without true love meaningful art and real rationality But compatibilists and semicompatibilists argue that determinism need not worry us As long as our actions are free This volume is a very interesting and clearly written contribution to the literature on free will and determinism Choice From the Back Cover This book is clearly and compellingly written and highly original
