By Curran F. Douglass : Rationality, Control, and Freedom: Making Sense of Human Freedom morality is the product of the evolutionary development of man morality is always relative and never absolute free will is the ability to choose between different possible courses of action unimpeded it is closely linked to the concepts of responsibility

praise guilt sin Rationality, Control, and Freedom: Making Sense of Human Freedom:

The subject of this book is the controversy — one of the oldest in philosophy — about whether it is possible to have freedom in the face of universal causal determinism. Of course it is crucial to consider what such freedom might mean — in particular there is an important distinction between libertarian “free will” and the more naturalistic view of freedom taken by compatibilists. This book provides a concise clear summary of the history of the free will vs determinism controversy and offers a discussion of the basic differences of view. It offers a solution that is within the tradition of compatibilism linking the conc
